My Website

Introduction: I plan to build a website where people can sell antique and philatelic items. People will bid to their desired product and the highest bidder will get the product.

My hobby is to collect coins, banknotes and stamps. I think that people like us don't have an appropriate platform where they can increase their collection. That's why I plan to build this type of website.

Expected List of Features: I want a special feature in my website which is secret bidding. It means that if I am the highest bidder of a product then I can increase my bid amount but this amount will only be visible if someone else crosses my previous bidding amount. It is because everyone can not remain available all the time. So, it will help busy people.

Market Survey: Five similar Websites:

1. https://www.mediabd.net/
2. https://www.ebay.com/
3. https://www.webstore.com/online-auctions/
4. https://www.auctionmaxx.com/
5. http://www.atomicmall.com/

Here, all the websites have similar features but only the first one has an exceptional feature that is the secret bidding that I mentioned earlier
